

Information Security Statement

Octavius Infrastructure Ltd is committed to protecting the confidentiality, integrity and availability of information across all aspects of its operations. We operate a robust Information Security Management System (ISMS) aligned with ISO/IEC 27001:2022, ensuring that information is safeguarded against unauthorised access, loss, misuse or disclosure.

Our approach to information security includes clear policies, defined responsibilities and comprehensive risk management processes designed to identify, assess and mitigate potential threats. We maintain strict controls over data handling, system access and technology use, supported by continuous monitoring, incident response procedures and regular staff training.

We apply appropriate data classification, retention and protection measures, and ensure compliance with all relevant legal, regulatory and contractual requirements, including data protection legislation.

Information security is embedded within our organisational culture, with all employees, contractors and partners expected to uphold these standards. Through ongoing review and improvement, we aim to provide assurance to our customers, stakeholders and partners that their information is handled securely and responsibly at all times.
